This expanded Standard Line offers a broader range of Pre-Engineered DT Cores optimized to better fit more applications with minimal adjustments.

Available in 23 standard sizes, and also as customs, DT Series Collapsible Cores eliminate the need for complex unscrewing mechanisms as well as providing solutions to release internal undercut features such as O-ring grooves, slots, and snap fit details. DT Cores can be delivered with or without part details.

Note: The catalog numbers come from the diameter range of each core. Dimensions in the table reflect steel with material shrinkage included.
