Di-Pro polishing/filing machines

The Di-Pro™ represents a new standard of high-end polishing/filing machines with an increased focus on the operator's well-being. The low levels of vibration greatly reduce the risk of Hand Arm Vibration Syndrome (HAVS) – without compromising performance.

The dangers of Hand-Arm Vibrations (HAV) have in recent years been focused as one of the main occupational hazards all over the vibrating tools-using industry. With this in mind Diprofil has developed a high quality low-vibrating machine with reduced vibration levels and the same renowned quality standard as the Classic Diprofil Machine. To achieve as low vibration levels as possible, the Di-Pro™ has been optimized for tools within a certain weight-span. This is based on Diprofil's long experience in tools normally used with this type of machine and keeping within this weight-span gives optimal efficiency in relation to the vibration levels.

For the best efficiency to vibration-ratio, the following tools are recommended:

- Diprofil diamond files type DLA, DLE, DLF, DLM and DBE
- Selected Diprofil lapping tools
- Selected Diprofil polishing tools
- Di-Pro stoning- & polishing tools

The Di-Pro™ is available with the following drive sources:

- Flexible shaft connection (slip-joint / ball-joint)
- Integrated micro-motor
- Integrated air-motor

Flexible-shaft driven machine with slip-joint connection (European standard)

FXB - FXK

REF	Tool holder	€
FXB	Ø 3,5 mm	1291,83
FXK	Ø 6,4 mm	1426,4

Drive:	The FXB and FXK models should be driven by an electrical hanging-motor with speed control and a flexible-shaft with slip-joint connection (European standard) e.g. Diprofil type DSE-47. Corresponding motors of other brands may also be used.	
Speed (maximum):	7.000 rpm	
Speed (recommended):	5.000 – 7.000 rpm (depending on the weight of the used tool).	
Stroke length:	0 – 6 mm (recommended 0,5 – 4 mm NOTE! At stroke lengths exceeding 4 mm a maximum speed of 5.000 rpm is recommended.	
Weight:	FXB: 740 g	FXK: 780 g
Noise level:	not exceeding 75 dB A at 7.000 rpm	
Vibration levels:	Not exceeding 2,5 m/s ² when the machine is operated according to the operation guide.	

For more information about vibration levels when using certain tools at different speeds and stroke lengths, please see the operation guide. Frequency weighed hand/arm vibration principally in accordance with ISO 28927-8.

FXD - FXL

Air driven machine

REF	Tool holder	€
FXD	Ø 3,5 mm	1875,04
FXL	Ø 6,4 mm	2007,33

Drive:

The FXD and FXL models have a built in air-motor and should be driven by compressed and oil mist lubricated air. PLEASE NOTE! The built-in air-motor may be damaged, if operated with un-lubricated air. Connection: The Diprofil quick-coupling HSL-M and fog lubrication unit MFB should be used for connection to your compressed air system.

PLEASE NOTE! Protect the air inlet from dust and dirt, when not in operation.

Speed (maximum):

7.000 rpm

Speed (recommended):

5.000 – 7.000 rpm (depending on the weight of the used tool).

Stroke length:

0 – 6 mm (recommended 0,5 – 4 mm) NOTE! At stroke lengths exceeding 4 mm a maximum speed of 5.000 rpm is recommended.

Weight:

FXD: 880 g FXL: 920 g

Oil consumption:

minimum 30 mm³/min. at maximum speed (about 2 drops/min.)

Air pressure:

4 bar (57psi)

Air consumption:

Approx. 60 l/min at 7.000 rpm

Noise level:

not exceeding 75 dB A at 7.000 rpm

Vibration levels:

Not exceeding 2,5 m/s² when the machine is operated according to the operation guide.

For more information about vibration levels when using certain tools at different speeds and stroke lengths, please see the operation guide. Frequency weighed hand/arm vibration principally in accordance with ISO 28927-8.

Machine with built-in micro-motor (Diprofil connector)

FXP - FXM

REF	Tool holder	€
FXP	Ø 3,5 mm	1863,54
FXM	Ø 6,4 mm	1995,82

Drive:	The FXP and FXM models have a built-in micro-motor, which is connected to, and controlled by, the DIPROFIL DPU-3, TPU-20 or corresponding power units.
Speed (maximum):	7.000 rpm
Speed (recommended):	5.000 – 7.000 rpm (depending on the weight of the used tool).
Stroke length:	0 – 6 mm (recommended 0,5 – 4 mm) NOTE! At stroke lengths exceeding 4 mm a maximum speed of 5.000 rpm is recommended.
Weight:	FXP: 960 g FXM: 980 g
Noise level:	not exceeding 75 dB A at 7.000 rpm
Vibration levels:	Not exceeding 2,5 m/s ² when the machine is operated according to the operation guide.

For more information about vibration levels when using certain tools at different speeds and stroke lengths, please see the operation guide. Frequency weighed hand/arm vibration principally in accordance with ISO 28927-8.

FXB - FXK

Spare parts

Slip-joint Connection Diprofil Di-Pro Machines: No. 400 or higher. Item No.: FXB and FXK.

Pos.	REF	Description.
1.	FXA-21.	Connecting sleeve.
2.	FXA-22.	Spindle drive mounting.
3.	FXA-23.	Handle sleeve.
4.	FXA-24.	Handle sleeve cover.

(All Parts 20mm longer, than on older machines)

Slip-joint Connection Diprofil Di-Pro Machines: 1 Older, No.001 to 399. Item No.: FXB and FXK.

Pos.	REF	Description.
1.	FMK-2.	Connecting sleeve.
2.	FMK-3.	Spindle drive mounting.
3.	FMK-1.	Handle sleeve.
4.	FXA-15.	Handle sleeve cover.

Original reciprocating polishing/filing machine

Info

The Original Diprofil Reciprocating Filing Machines are designed for efficient polishing and finishing operations.

The Diprofil Machines, with a wide range of tools and accessories, have been developed by careful studies of fine mechanical handwork and finishing operations. They facilitate filing, lapping, honing, polishing etc. and have become an important concept in the daily work of moldmaking, die-sinking, toolmaking and other fine mechanical precision work.

All Diprofil Machines are delivered in a handy tool-box with the necessary accessories.

4

FPD/R - FPL/R

Air drive

REF	Old DME REF	Tool holder	€
FPD/R	HDL 50	Ø 3,5 mm	1607,82
FPL/R	HDL 100	Ø 6,4 mm	1658,78

The air-driven Original Diprofil Filing Machine, has a specially developed 18-cylinder radial piston-type air motor with integrated speed regulator.

The machine is available with a Ø 3,5 mm tool holder (FPD/R) or a Ø 6,4 mm tool holder (FPL/R).

The airmotors are manufactured with a very high level of accuracy and require lubricated and filtered air (5µ) to obtain a long and trouble-free lifetime.

For better comfort, each model is fitted with an ergonomic rubber sleeve.

Technical data

Stroke length:	0-6 mm (recommended 0,5-3mm)
Speed:	max 8.000 rpm (recommended: 5.000 - 7.000 rpm)
Weight:	750 - 780 g
Oil consumption:	minimum 30 mm ³ /min. at maximum speed (about 2 drops/min.)
Air pressure:	FPD/R: 4 bar (57psi) FPL/R: 4 bar (57psi)
Air consumption:	FPD/R: Approx. 65 l/min at 8.000 rpm FPL/R: Approx. 60 l/min at 7.000 rpm
Noise:	< 70 dB(A) at 7.000 rpm
Vibration:	with standard tool holder (Ø 3,5 mm) 3-10 m/s ² with heavy duty tool holder (Ø 6,4 mm) 4-12 m/s ² .

Frequency weighed hand/ arm vibration, principally in accordance with ISO 28927-8. For further details, see diagram and other information in the corresponding Operation Guide.

Flexible-Shaft Drive - Slip Joint Connection

FPB/R - FPK/R

REF	Old DME REF	Tool holder	€
FPB/R	HD 50	Ø 3,5 mm	930,15
FPK/R	HD 100	Ø 6,4 mm	981

The Original Diprofil Filing Machine for flexible-shaftdrive is available for connection to Slip Joint.

The machines can be supplied with two different tool holders, standard Ø 3,5 mm (FPB/R) or heavy duty Ø 6,4 mm (FPK/R). For better comfort, each model is fitted with an ergonomic rubber sleeve.

Technical data

Stroke length: 0-6 mm (recommended 0,5-3mm)
 Speed: max 8.000 rpm (recommended: 5.000 - 7.000 rpm)
 Weight: 585 - 615 g
 Noise: < 70 dB(A) at 7.000 rpm
 Vibration: with standard tool holder (Ø 3,5 mm) 3-10 m/s²
 with heavy duty tool holder (Ø 6,4 mm) 4-12 m/s².

Frequency weighed hand/arm vibration, principally in accordance with ISO 28927-8. For further details, see diagram and other information in the corresponding Operation Guide.

FPP/R - FPM/R

Micro Motor Drive - Integrated Micro Motor

REF	Tool holder	€
FPP/R	Ø 3,5 mm	1644,85
FPM/R	Ø 6,4 mm	1696,03

The Original Diprofil Filing Machine for Micro motor drive can be supplied with two different tool-holders, standard Ø 3,5 mm (FPP/R) or heavy duty Ø 6,4 mm (FPM/R). These have a built-in micro-motor, which is connected to, and controlled by, the DIPROFIL DPU-3, TPU-20 or corresponding DME/EOC power units (e.g. Grande,...). For better comfort, each model is fitted with an ergonomic rubber sleeve. The machine is also available with Eneska 3-1 connector (FPM/ERJ, FPP/ERJ).

Technical data

Stroke length:	0-6 mm (recommended 0,5-3mm)
Speed:	max 8.000 rpm (7.000 rpm at 32V) recommended: 5.000 - 7.000 rpm
Weight:	800 - 830 g
Noise:	< 70 dB(A) at 7.000 rpm
Vibration:	with standard tool holder (Ø 3,5 mm) 3-10 m/s ² with heavy duty tool holder (Ø 6,4 mm) 4-12 m/s ² .

Frequency weighed hand/ arm vibration, principally in accordance with ISO 28927-8. For further details, see diagram and other information in the corresponding Operation Guide.

Spare Parts

FPB/R - FPK/R

Slip-joint Connection.
Diprofil Classic Machines: Item No.: FPB and FPK.

Pos.	REF	Description.
1.	FMK-2.	Connecting sleeve.
2.	FMK-3.	Spindle drive mounting.
3.	FMK-1.	Handle sleeve.
4.	FMM-9.	Rubber cover for Classic machines.

Info

Diprofil Protective Finger Sleeves

The old (wrong) way.....

The new (right) way!

To further emphasize our focus on the importance of reducing potentially harmful vibrations we are now introducing the new Diprofil Protective Finger Sleeve.

It's a well known fact that it's actually more common for operators to sustain vibration related injuries in the hand guiding the tool rather than in the hand holding the actual machine. With this in mind we have developed the Diprofil protective finger sleeve. The finger sleeve will improve guidance of the tool as there is no longer any need for putting your fingers on moving tools and/or machine parts.

The finger sleeve is compatible with both the Classic and the low-vibrating Di-Pro polishing-/filing machines and comes with an extension rod for longer tools in two different versions depending on the size of the original tool-holder (Ø 3,5 or 6,4 mm). For more information on each specific item please see the technical information above.

The two different models available for either 3,5 or 6,4 mm tool-holders are the following:

- | | |
|---------|---|
| PFS-3,5 | Compatible with both the Classic and the low-vibrating Di-Pro polishing-/filing machines fitted with 3,5 mm tool-holders. |
| PFS-6,4 | Compatible with both the Classic and the low-vibrating Di-Pro polishing-/filing machines fitted with 6,4 mm tool-holders. |

Both versions comes in a handy box with the necessary tools and an instruction on how to attach it to your machine.

Protective Finger Sleeve for the Ø 3,5 mm tool-holder

PFS-3,5

Outer Ø: 23 mm
Length (without extension rod): 34 mm
Length (including extension rod): 91 mm
Maximum tool shank Ø: 3,5 mm
Weight (without extension rod): 33 g
Weight (including extension rod): 50 g

REF	€
PFS-3,5	137,53

Protective Finger Sleeve for the Ø 6,4 mm tool-holder

PFS-6,4

Outer Ø: 26 mm
Length (without extension rod): 48 mm
Length (including extension rod): 105 mm
Maximum tool shank Ø: 6,4 mm
Weight (without extension rod): 49 g
Weight (including extension rod): 66 g

REF	€
PFS-6,4	149,03

Info

Diprofil mini polishing/filing machines

A complete system for working on difficult surfaces. Low weight and a thorough ergonomic design results in a more effective finishing and polishing work, especially in narrow and confined spaces.

The Diprofil Mini Filing Machine is available with 3 different stroke lengths. For lowest possible vibration levels we recommend using light weight tools and tool-holders. Using the Diprofil Mini Filing Machine gives you total control even when working in the most narrow spaces on a delicate workpiece.

All Dipromini machines are delivered in a handy tool-box with the necessary accessories.

Flexible-Shaft Drive - Slip Joint Connection

FMR/S...

REF	Old DME REF	Stroke length	€
FMR/S5	HDW 1	0,5 mm	501,2
FMR/S10		1,0 mm	501,2
FMR/S15	HDW 2	1,5 mm	501,2

The Diprofil Mini Polishing/Filing machine for flexible-shaft drive is available for connection to Slip Joint. There are three basic models with 0,5 mm (FMR/S5), 1,0 mm (FMR/S10) or 1,5 mm (FMR/S15) stroke length.

Technical data

Tool holder:	max Ø 3,6 mm
Stroke length:	0,5, 1,0 or 1,5 mm
Speed:	max 12.000 rpm recommended: 5.000 - 11.000 rpm
Dimension:	Ø 24 mm
Weight:	approx. 120 g
Noise:	< 70 dB(A) at 9.000 rpm
Vibrations:	stroke 0,5 mm: <2,5 m/s ² , stroke 1,0 mm: 1,5 - 3 m/s ² , stroke 1,5 mm: 1,5 - 4 m/s ²

Frequency weighed hand/arm vibration, principally in accordance with ISO 28927-8. For further details, see diagram and other information in the corresponding Operation Guide.

FMR/G...

Micro Motor Connection - Gesswein, Argofile & Uhandy

REF	Old DME REF	Stroke length	€
FMR/G5	JA 60	0,5 mm	501,2
FMR/G10		1,0 mm	501,2
FMR/G15	JA 65	1,5 mm	501,2

The Dipromini Filing Machine for Gesswein, Argofile and Uhandy connection can be supplied with three different stroke lengths: 0,5 mm (FMR/G5), 1,0 mm (FMR/G10) or 1,5 mm (FMR/G15).

Technical data

Tool holder:	max Ø 3,6 mm
Stroke length:	0,5, 1,0 or 1,5 mm
Speed:	max 12.000 rpm recommended: 5.000 - 11.000 rpm
Dimension:	Ø 24 mm
Weight:	approx. 120 g
Noise:	< 70 dB(A) at 9.000 rpm
Vibrations:	stroke 0,5 mm: <2,5 m/s ² , stroke 1,0 mm: 1,5 - 3 m/s ² , stroke 1,5 mm: 1,5 - 4 m/s ²

Frequency weighed hand/arm vibration, principally in accordance with ISO 28927-8. For further details, see diagram and other information in the corresponding Operation Guide.

Flexible-Shaft Drive - Slip Joint Connection

FMR/D...

REF	Stroke length	€
FMR/D5	0,5 mm	501,2
FMR/D10	1,0 mm	501,2
FMR/D15	1,5 mm	501,2

Dipromini polishing/filing Machine with connection for Diprofil micro motor type HPM-B1 which should be connected to, and controlled by, the DIPROFIL DPU-3, TPU-20 or corresponding power units. Available with three different stroke lengths: 0,5 mm (FMR/D5), 1,0 mm (FMR/D10) or 1,5 mm (FMR/D15).

Technical data

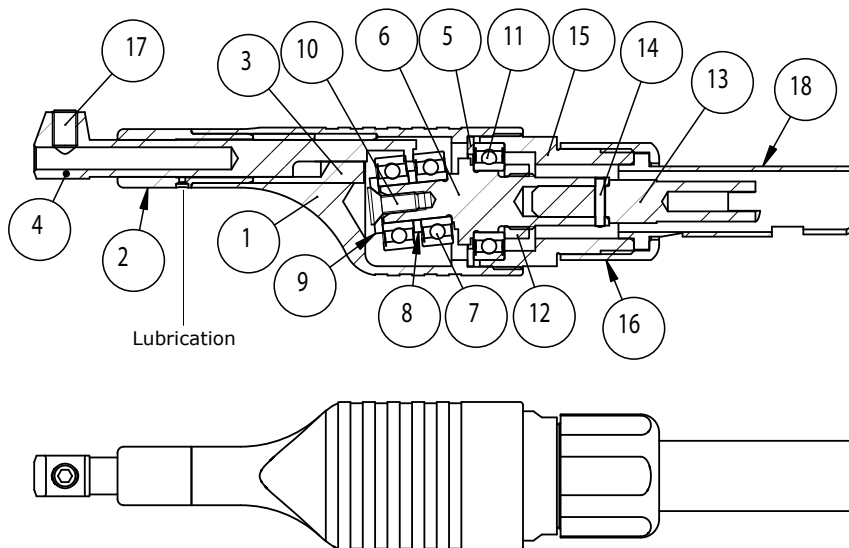

Tool holder:	max Ø 3,6 mm
Stroke length:	0,5, 1,0 or 1,5 mm
Speed:	max 12.000 rpm recommended: 5.000 - 11.000 rpm
Dimension:	Ø 24 mm
Weight:	approx. 120 g
Noise:	< 70 dB(A) at 9.000 rpm
Vibrations:	stroke 0,5 mm: <2,5 m/s ² , stroke 1,0 mm: 1,5 - 3 m/s ² , stroke 1,5 mm: 1,5 - 4 m/s ²

Frequency weighed hand/arm vibration, principally in accordance with ISO 28927-8. For further details, see diagram and other information in the corresponding Operation Guide.

Transverse mini polishing/filing machine

Info

This machine has a transverse movement for working on difficult surfaces, and is especially suitable on narrow shoulders. Variable stroke between 0-4 mm, that is easy to change by use of a hexagon key. The small and handy dimension improves control and effectiveness for polishing and finishing work. For the lowest possible vibration levels we recommend using light weight tools and tool-holders such as the THFS-1 and THPS-3.

All Diprofil Machines are delivered in a handy tool-box with the necessary accessories.

FMV/S

Flexible-shaft Drive - Slip Joint Connection

REF	€
FMV/S	548,59

The Diprofil Transverse Mini Polishing/Filing machine for flexible-shaft drive is available for connection to Slip-joint (FMV/S).

Technical data

Tool holder:	max Ø 3,6 mm
Stroke length:	Variable stroke 0-4 mm (measured 60 mm from the machine housing)
Speed:	max 12.000 rpm (at max 2 mm stroke length) recommended 5.000-11.000 rpm
Dimension:	Ø 24 mm
Weight:	235 g
Noise:	< 78 dB(A) at 12.000 rpm
Vibrations:	1,5 - 3,5 m/s ²

Frequency weighed hand/arm vibration, principally in accordance with ISO 28927-8. For further details, see diagram and other information in the corresponding Operation Guide.

Micro Motor Connection - Gesswein, Argofile & Uhandy

FMV/G

REF	€
FMV/G	548,59

The Diprofil Transverse Mini Polishing/Filing machine is available for Gesswein, Argofile and Uhandy connection (FMV/G).

Technical data

Tool holder:	max Ø 3,6 mm
Stroke length:	variable stroke 0-4 mm (measured 60 mm from the machine housing)
Speed:	max 12.000 rpm (at max 2 mm stroke length) recommended 5.000-11.000 rpm
Dimension:	Ø 24 mm
Weight:	210 g
Noise:	< 78 dB(A) at 12.000 rpm
Vibrations:	1,5 - 3,5 m/s ²

Frequency weighed hand/arm vibration, principally in accordance with ISO 28927-8. For further details, see diagram and other information in the corresponding Operation Guide.

Info

For efficient polishing and finishing operations

Rotary handpieces for efficient grinding, polishing and finishing operations with tools such as diamond and CBN pins, felt bobs and wood bobs.

All rotary hand pieces comes with the necessary tools and accessories.

C-HPM-BL1

Brushless Rotary Hand-piece

REF	€
C-HPM-BL1	1080,36

Micro-motor driven rotary hand-piece with brushless motor for use together with twin power unit TPU-20. Features a quick change design for both the collet and the tool and is supplied with 3,0 mm collet. Optional 2,35 mm collet available.

Technical data

Speed:	max. 40.000 rpm
Consumed power:	max. 230 W
Torque:	8,5N cm
Weight:	350 g
Dimensions:	L159 x Ø27 mm
Noise:	< 70 db(A) at 40.000 rpm
Vibrations:	< 2,5 m/s ²

Brushless Rotary Hand-piece

C-HPM-BL2

REF	€
C-HPM-BL2	1080,36

Micro-motor driven high speed rotary hand-piece with brushless motor for use together with twin power unit TPU-20. Features a quick change design for both the collet and the tool and is supplied with 3,0 mm collet. Optional 2,35 mm collet available.

Technical data

Speed:	max. 50.000 rpm
Consumed power:	max. 230 W
Torque:	7,6N cm
Weight:	350 g
Dimensions:	L159 x Ø27 mm
Noise:	< 70 db(A) at 50.000 rpm
Vibrations:	< 2,5 m/s ²

4

Rotary Hand-piece

C-HPM-B1

REF	€
C-HPM-B1	608,43

Micro-motor driven high speed rotary hand-piece with carbon brush motor for use together with power unit DPU-3 or twin power unit TPU-20. Features a quick change design for both the collet and the tool and is supplied with 3,0 mm collet. Optional 2,35 mm collet available.

Technical data

Speed:	max. 38.000 rpm
Consumed power:	100 W
Torque:	4,0N cm
Weight:	285 g
Dimensions:	L159 x Ø29,5 mm
Noise:	< 70 db(A) at 38.000 rpm
Vibrations:	< 2,5 m/s ²

DPU-3

Diprofil Power Unit

REF	€
DPU-3	500,26

This compact and ergonomic Power Unit is designed for use together with dedicated rotary hand-pieces and micro-motor driven reciprocating Diprofil polishing/filing machines with carbon brush motors. It has high torque and electrical feedback circuitry. Other features include continuously variable speed, forward / reverse switch and automatic overload protection. Supplied with foot control type DPU-3-FC for optional speed adjustment.

Technical data

Input:	AC 110/220 V at 50/60 Hz
Output:	DC 0 – 32 V, 1,2 A
Power:	max. 100 W
Weight Power unit:	1,7 kg
Dimensions Power unit:	W115 x D147 x H96 mm
Weight Foot control:	585 g

Micro-motor

HPM-B1

REF	€
HPM-B1	342,29

DC micro-motor adapted for Diprofil mini polishing/filing machines type FMR/D, FMV/D and rotary hand-piece type C-HPM-B1. For use together with power unit DPU-3 or twin power unit TPU-20.

Technical data

Speed:	max. 38.000 rpm
Consumed power:	100 W
Torque:	4,0N cm
Weight:	190 g
Dimensions:	L100 x Ø29,5 mm
Noise:	< 70 db(A) at 38.000 rpm
Vibrations:	< 2,5 m/s ²

4

TPU-20

Diprofil Twin Power Unit

REF	€
TPU-20-220V	1059,85

Twin power unit featuring dual control system for both brushless and carbon brush micro-motors (not simultaneously). Variable speed control by hand dial or the included foot control type TPU-20-FC. Supplied with hand-piece cradle and a convenient magnetic tool holder.

- Digital display showing the speed in rpm
- Maximum torque set mode
- Maximum speed set mode
- Built in handle for best portability
- Error code display function
- Foot control with auto-cruise speed function
- Self diagnosis system

Technical data

Input:	AC 200 ~ 240 V at 50/60 Hz
Output:	DC 0 – 32 V, 1,6 A, BLDC 0 – 32 V, 1,6 A
Power DC:	max. 185 W
Power BLDC:	max. 245 W
Weight Power unit:	2,9 kg
Dimensions Power unit:	W137 x D232 x H180 mm
Weight Foot control:	575 g

D/G

Adapter

REF	€
D/G	102,71

Adapter for connecting Urawa, Argofile and Gesswein front-pieces to the Diprofil micro-motors type HPM-BL1 and HPM-B1 (when using DC motor type HPM-B1 a specific shaft with item no. D/G-7 is also required).

Lubrication

MFB - MFA-K

REF	Description	€
MFB	Dipro-fog	393,88
MFA-K	Lubrication oil (0.5 l)	34,25

The Dipro-fog (MFB) package consists of air filter, regulator, manometer, and fog lubrication device, all in one, with tubing and Dipro-fog oil (MFA-K).

Technical data

Max primary pressure: 16 bar
 Max capacity at 7 bar: 1200 l/min
 Hose connection: 7 mm
 Secondary pressure: 0,5 - 10 bar

4

Quick Coupling

HSL-M

REF	Old DME REF	€
HSL-M	HDL	127,25

Each air-driven machine requires a quick coupling (HSL-M) as well as a fog lubricating device type Dipro-fog MFB to ensure efficient lubrication at all times. A 3-way hose connection and air hose is also available.

Info

Precision Diamond Files

Diprofil Diamond Files are made from carefully selected diamonds, precisely bonded to obtain the best physical properties for added strength and resistance to wear. Diamond files are excellent for use on carbide, hardened steel, glass, ceramics and other similar materials.

Other shapes, dimensions and grit sizes available upon request.

Diamond and CBN Rotary Tools

Info

4

Diprofil Rotary Diamond and CBN Tools are made from carefully selected quality diamonds and Cubic Boron Nitride, precisely bonded to obtain the best physical properties for added strength and resistance to wear.

Electroplated Diamond pins and wheels are excellent for general grinding applications in hard materials such as carbide, hardened steel and ceramics. They are normally used without cooling agent but in stationary applications, and when grinding in thin glass cooling is often required. Maximum temperature for Diamonds is 800° C.

Electroplated cylindrical CBN pins are excellent for general grinding applications in hardened steel. They are normally used without cooling agent but in stationary applications cooling is often required. Maximum temperature for CBN is 1200° C.

Recommended speeds

Recommend speed for dry cutting:

Diamond: 10 – 20 m/s

CBN: 15 – 30 m/s

Recommend speed for wet cutting:

Diamond: 15 – 30 m/s

CBN: 20 – 45 m/s

Cooling: Cooling normally enhances the lifetime of the tools. In addition it also generates a better surface. The risk for damage on thin or sharp edges of the grinding tool is reduced when using coolant.

Cooling is performed with an emulsion or grinding oil. For diamond tools an Emulsion is specially recommended and for CBN tools a mineral oil is preferable.

Info

Original diprofil precision CBN tools

Diprofil CBN Rotary Tools are made from carefully selected CBN (Cubic Boron Nitride), precisely bonded to obtain the best physical properties for added strength and resistance to wear. CBN tools are excellent for use on Tool Steels, Stainless Steels and Cast Iron.

Other shapes, dimensions and grit sizes available upon request.

DI-PRO Polishing-kit

FX-PK

The low weight of the tools makes them especially suitable for use with the low-vibrating Di-Pro Polishing-/Filing machines. Using the tools included in this kit ensures that potentially harmful vibrations are kept at a minimum level. Also reduces the need for adding and removing counterweight inserts as all the included tools are within the same weight span.

Kit includes the following items:

- 1 Toggle rod TR-3140
- 2 pcs of MS-15x13
- 1 pc of MS-33x13
- 2 pcs of FF-15x13
- 1 pc of FF-33x13
- 2 pcs of VF-15x13
- 1 pc of VF-33x13
- 1 pc of PS-129
- 1 pc of PS-309
